

Program Learning Outcomes Anthropology

1. Describe how evolutionary and historical processes have shaped primates and human ancestors and lead to the biological, behavioral, and cultural diversity seen in the present.
2. Describe how cultural systems construct reality differently for various human groups.
3. Describe how varying types of data are collected, analyzed, synthesized, and interpreted to achieve these first two goals.
4. Communicate anthropological knowledge effectively through written, oral, and data presentation in varying formats for diverse audiences.
5. Discuss human diversity and how knowledge about human diversity should lead to a better understanding of and therefore respect for people different from ourselves.
